SUMMARY OF QUALIFICATIONS:

Founding SSGA Architect | Founder & Principal Architect | Senior Web Engineer | Full-Stack Developer | Senior Graphic Designer: With 18+ years in web engineering, within a 25-year career that began in graphic design and digital publishing, I bridge the gap between complex digital strategy and high-performance web execution. I specialize in modernizing legacy systems and architecting secure, scalable front/back-end ecosystems for high-stakes environments. My focus is **intent-driven web engineering**: ensuring every line of code serves the broader business architecture.

Core Expertise:

Architecture & Leadership: Strategy-led system design, stakeholder management, and cross-platform infrastructure.
Front-End Mastery: Specialist in Angular CLI and CSS/SCSS architecture, with working depth in Next.js (React) and Nuxt (Vue.js).
Federal/Secure Environments: Six years of federal and state contract work under a DHS Public Trust, delivering Section 508– and ADA-compliant applications.

TECHNICAL SKILLS INDEX:

Expert: HTML5, CSS3/SCSS, JavaScript, TypeScript, Angular CLI, Angular Material, Bootstrap, jQuery, WordPress, Responsive Web Design, WCAG/Section 508 Accessibility, Metadata & SEO, Git/GitHub, Netlify, Adobe Creative Cloud, Graphic & UI Design.
Working: Next.js (React), Nuxt (Vue.js), Nuxt UI, Tailwind Plus, Node.js/npm, Vite, Drupal (Composer/Drush), PHP, MySQL/MariaDB, Microsoft SQL Server (SSMS), Java/Spring (Hibernate/Envers), Groovy/Grails, Python, REST/JSON APIs, SharePoint, Microsoft 365 Administration, Google Ads/Analytics/Search Console/Tag Manager, Meta for Business, Google Cloud Run, Cypress, Agile Methodology, Google Workspace, Apple Creator Studio.
Familiar: AWS, Azure, Docker, Kubernetes, NoSQL databases, GraphQL, React Native, and UI libraries including MUI, Vuetify, PrimeUI, Ant Design, Chakra UI, Mantine, Radix UI and Kendo UI.
Government, Security & Strategy: DHS Public Trust (NACI), 2019-2025; DoD-Issued Common Access Card (CAC); Section 508 and ADA Compliance; Secure Data Handling; Digital Strategy; Stakeholder Management.

EDUCATION:

- **Pluralsight Premium, *Online Tech Skills Platform***, May 2020-Present—**Angular and React Developer Role/Skill IQs**
  • What Is Angular? • Angular: Getting Started • Angular 6: The Big Picture • Angular: Creating a Basic Component (Interactive) • What Is React? • React: The Big Picture • React Fundamentals

- **O'Reilly Membership, *Online IT Studies Platform,*** October 2019-May 2020
  - Groovy Programming Fundamentals
  - Starting a Grails 3 Project
  - Understanding the Grails 3 Domain Model
  - Advanced Databases and REST Principles in Grails 3
  - Modern JavaScript From The Beginning
  - Bootstrap 4 From Scratch With 5 Projects

- **TechLEAP/WebLEAP Program (Technology/Web Development Leading Edge Apprenticeship Program),**
  Graduate-Level Certificate Classes in IT Studies,
  Montgomery College, Rockville, MD, September 2015-May 2016
  Relevant Coursework:
  - Adobe Photoshop I—Foundation Skills
  - HTML5—Level I
  - HTML5—Level II
  - HTML5—Level III: Responsive Web Design (RWD) and Front-End Frameworks
  - JavaScript Programming
  - jQuery with JavaScript
  - JavaScript Patterns—Advanced JavaScript
  - PHP/MySQL—CMS and Web Management
  - Programming Fundamentals
  - Python Programming
  - Ruby on Rails—Level I
  - WordPress
  - XML—Introduction

- **Bachelor of Arts Degree in Art, *Graphic and Web Design Concentration,***
  Virginia Intermont College, Bristol, VA, September 2003-April 2006

EXPERIENCE:

• Auralicode LLC—Montgomery Village, MD **07/2025 – Present**

Founding SSGA Architect, Founder & Principal Architect— Focus: Sovereign Static Generated Architecture; Accessibility Modernization; SSGA Deployment Workflow; Strategic Ownership; Modern Stack and Toolchains

- SSGA Architectural Leadership: Founded and led a high-precision discipline focused on modernizing public-facing systems through scalable, component-driven architectures built with Angular CLI, Next.js (React), Nuxt (Vue.js), and strict TypeScript.
- System Integrity & Human-Led Engineering: Designed and delivered maintainable, accessibility-forward applications with clear domain boundaries, predictable interaction models, and evolvable codebases engineered for long-term stability.
- End-to-End Stewardship: Directed the full lifecycle of sovereign software initiatives—from discovery and UX design and architecture through UI development and implementation, deployment, and ongoing technical stewardship—ensuring systems remain coherent, performant, and future-proof.

• Light of the World Foundation—Bowie, MD **12/2018 – 12/2025**

WordPress Developer (Freelance)— Focus: Strategic Advisory & Full-Scale Modernization

- Technical Advisory: Served as a strategic advisor to organization co-founders, providing high-level recommendations for long-term digital growth and server-side stability.
- Full-Scale Execution: Managed the complete end-to-end re-creation of the foundation's digital presence, delivering a scalable, mobile-first architecture on a fixed budget.
- Infrastructure Growth: Laid the technical groundwork for multi-site expansion, automating plugin management and optimizing the PHP/MySQL backend.

• Maryland Office of the Public Defender, IT Division—Linthicum Heights, MD **12/2024 – 06/2025**

Lead IT Programmer Analyst (State Contract)— Focus: Application Development & M365 Administration

- Application Development (about 75% of role): Built and maintained front-end and middleware features in eDefender, the agency's proprietary case-management application from Journal Technologies, working in its JSX interface layer and Groovy/JVM middleware.
- Database Work (10–15%): Wrote and maintained Microsoft SQL Server queries and handled supporting database administration tasks for the application's back end.
- Microsoft 365 Administration (10–15%): Served as assistant Microsoft 365 administrator for the IT Division, supporting the application supervisor.

• Cherokee Federal, serving the US Coast Guard—Baltimore, MD **12/2020 – 02/2024**

Mid-Level Web Developer (Contract)— Focus: Security, CUI, and Complex Logic

- Security & Compliance: Managed and developed Controlled Unclassified Information (CUI) systems for the USCG, holding a Public Trust position (NACI) with government CAC access.
- Systems Engineering: Re-architected the IPB (Information Parts Breakdown) application, replacing static methods with dynamic RESTful APIs (AJAX/JSON) and custom JavaScript event architecture.
- Performance: Improved data visualization by engineering custom highlighting, scaling, and image-loading functions for complex parts-index systems.

• Cloud Lake Technology, serving the US State Department—Herndon, VA **10/2020 – 11/2020**

Application Engineer (Contract)— Focus: Mission-Critical Support & DevOps Workflow

- State Department Lead: Served as the UX Development Engineer for high-visibility U.S. State Department platforms, managing full-lifecycle development and maintenance.
- Operational Excellence: Acted as the Tier-3 escalation point for a 24/7/365 global help desk, resolving high-priority technical issues for critical government communication tools.
- Deployment Workflow: Used a Git/GitHub workflow to deploy custom PHP themes and plugins within AWS cloud environments.

• TechSur Solutions, serving the General Services Administration—Herndon, VA **02/2020 – 07/2020**

Web Developer (Contract)— Focus: Full-Stack Modernization & Accessibility Leadership

- System Architecture: Engineered modern, responsive front-end ecosystems for the GSA's public-facing portfolio using ES6+, Sass, and Angular.
- CMS Engineering: Architected custom Drupal and WordPress themes and plugins, using Composer and Drush, and built reusable module libraries to standardize development across the enterprise.
- Compliance & UX: Led the implementation of Section 508 and ADA accessibility standards, significantly improving the digital experience for millions of federal users.
- Full-Stack Integration: Managed the LAMP stack environment, including database configuration and technical specification writing for new website use cases.

• Arena Technical Resources/GDIT, serving NOAA—Silver Spring, MD **10/2019 – 02/2020**

Junior Web Developer (Contract)— Focus: Modernization and Cross-Platform Integration

- Architectural Pivot: Spearheaded a critical XML-to-JSON-to-XML Python-based web service to modernize the CoMET system architecture.
- Modern Frameworks: Leveraged Grails 4/Groovy and Spring Boot to enhance NOAA federal enterprise metadata systems.
- Accessibility: Led UI/UX accessibility audits and remediation that brought four NCEI metadata applications to a passing Section 508 audit.

• Montgomery County Public Libraries—Rockville, MD **04/2017 – 01/2018**

Digital Strategies Specialist (Full-time)— Focus: Strategic Growth & Enterprise Efficiency

- Enterprise Intranet Design: Spearheaded the development of the SharePoint 2016 Intranet for 22 library branches, delivering a centralized sub-site architecture on time and on budget.
- Data-Driven Growth: Leveraged Google Analytics and SEO best practices to increase site traffic by an estimated 20% and search page rankings by an estimated 40%.
- Digital Accessibility: Directed a UI/UX overhaul that increased page accessibility by an estimated 80%, ensuring inclusive access for over 1.3 million residents.
- Agile Collaboration: Employed Scrum methodology to lead the creation of mobile-first features, balancing stakeholder requirements with technical constraints.

• The Mindful Habit—Roseville, CA **07/2016 – 09/2016**

Front-End Developer (Freelance)

- Architectural Recovery: Managed the full-scale technical planning and execution for a mission-critical rebuild of the "Feed the Right Wolf" coaching platform.
- UX Optimization: Engineered custom team interfaces that increased coach visibility by an estimated 75%, allowing the organization to scale its outreach efforts on a stable PHP/WordPress foundation.
- Performance Delivery: Delivered high-impact, responsive page redesigns on time and on budget, prioritizing intuitive navigation for a high-traffic wellness site.

• Claysmile—Silver Spring, MD **01/2015 – 04/2017**

Web and Print Designer (Freelance)

- System Standardization: Spearheaded an estimated 33% increase in company visibility by standardizing the creative product through a custom WordPress architecture and cohesive branding.
- Mobile-First Engineering: Optimized high-performance, responsive views for the global mobile ecosystem (iOS/Android), utilizing HTML5, CSS3, and jQuery to ensure cross-device consistency.
- Creative Direction: Owned the end-to-end execution of all digital and print marketing assets, aligning technical output with long-term brand strategy.

• Thought & Possibility—Washington Grove, MD **01/2009 – 12/2009**

Web Designer (Part-time)

- Multi-CMS Integration: Developed and customized enterprise-level client architectures using both Drupal 6 and Joomla content management systems.
- System Modernization: Completely re-engineered the digital presence for a leading psychotherapy trade magazine, improving site structure, navigation, and interactive jQuery elements.
- Lifecycle Management: Hand-coded high-performance HTML message templates and coordinated complex email marketing campaigns to drive user engagement.

• The Washington Post—Washington, DC **10/2006 – 02/2008**

Paginator (Full-time)

- Desktop Publishing: Associate for The Washington Post's Advertising Operations Department, using proprietary software systems (CCI and SCP Pagination Applications).
- Pagination Workflow: Prepared advertising content layouts (CCI-based pagination) and released display and classified products (SCP-based pagination); worked on multiple projects daily and completed all required documentation.

• Point of Departure—Frederick, MD **05/2005 – 10/2005**

Web Designer (Freelance)

- Legacy Architecture: Designed and engineered the foundational flagship issues of pointofdeparture.org, a modern creative music resource that has successfully scaled and remained live for over 21 years.
- Pioneering Design: Established the initial technical standards and UI/UX framework for what is now a highly renowned, long-running digital journal.
- Strategic Collaboration: Facilitated requirements gathering and coordinated with global contributors to ensure the seamless deployment of a robust, stable music archive.
